

# NGUYEN THI THU UYEN

*Front-end Developer*

## BRIEF INTRODUCTION

Hi, I'm a Front-end developer. My goal is to become a Fullstack on React Js (VueJs/AngularJs) and Node Js platforms within the next 3 years.

Before that, I was a bachelor in business administration. Ever since I was exposed to the IT industry, I knew I belonged in this world.

In the past year, I have been very focused on learning front-end web programming. Now I am very confident that my abilities can meet your requirements.

<https://github.com/NguyenUyen-ReactJs2206>

## HOBBY

- CODE is passionate.
- Learning new technology.
- Listening to music.
- Go backpacking.
- Relax.

## EDUCATION

### UNIVERSITY OF ECONOMICS AND LAW

2017 - 2021

Bachelor of Business Administration.

### T3H INFORMATION TECHNOLOGY INSTITUTE

Jul 2022 - Nov 2022

Front-end Developer.

HTML, CSS, Javascript, ReactJs.

**In addition, I also taught myself to code through some online courses and reading reference documents.**

## TECHNICAL SKILLS

### Programming Languages :

- JavaScript, TypeScript.
- I can learn and catch up with order languages to support my work when needed.

### Web Front-end Technologies :

- React, React Query, Redux, Hooks, Styled Components, Bootstrap, TailwindCss, MUI, Webpack, Axios, Vite, HTML5, SASS, CSS3, SEO, Library and Connect with MongoDB.
- In addition, I am also learning about Next Js, Vue Js and Node Js to improve my knowledge and serve my future work.

### Dev - Tools

Git, Postman, Lighthouse, React Dev Tool, Redux Dev Tool, React Query Dev Tool, Github, Figma, VS Code.

### Foreign Languages :

English: B1 ( Reading and Writing Basic )

### Industrial & Interpersonal Skills :

- Teamwork & Communication.
- Work independently.
- Problem-solving skills.
- Highly self-study.

# PROJECTS

## ● Sociopedia

September - October 2023

### Technologies and tool used:

- Front-end
  - Framework: React Js.
  - Build tool: Create React App.
  - Call APIs: Fetch API.
  - UI / CSS Library: Material UI.
  - State Management: Redux Toolkit and Redux Persist.
  - Form Management: Formik and validation with Yup.
  - Router: React Router.
  - API: Rest API with self-created server.

**Github:** <https://github.com/NguyenUyen-ReactJs2206/SocialNetwork/tree/main/client>

### Functions include:

- Manage authentication with JWT.
- Dark mode for app.
- Create articles.
- Like articles.
- Add friends.

- Back-end

- Framework: Node Js (Express Js).
- Build tool: Webpack.
- Database: MongoDB.
- Router in Express Js.
- Encrypt the password with Bcrypt.
- Authenticate user with Jsonwebtoken.
- Manage file storage and uploads in MongoDB using Multer.

**Github:** <https://github.com/NguyenUyen-ReactJs2206/SocialNetwork/tree/main/server>

### Conclude:

- This is a project that I researched and corrected errors along the way to better understand the combination of Back-end and Front-end.

## ● HYGGE EVENT

June - July 2023

### Technologies and tool used:

- Framework: React Js (Typescript)
- Build tool: Vite.
- UI / CSS Library: Tailwind Css.
- State Management: React Hook.
- Form Management: React Hook Form and validation with Yup.
- Router: React Router.
- Send email: Email Js.
- Multi language: i18next.
- ESLint, Prettier.
- Show message: React Toastify.

**Website:** <https://hygge-event.vercel.app/>

### Conclude:

This is a project I wrote entirely myself through the design of an event company. This project helps me gain a deeper understanding of how to write css using Tailwind Css that integrates responsive for many devices. At the same time, create a fully functional static website to introduce your business.

### Functions include:

- Build responsive websites for all screen types using Tailwind css.
- Custom components to optimize performance.
- Use i18next for multilingual conversion for the website.
- Synchronize urls for pages, user-friendly.
- Receive email feedback from users and send automatic thank you letters to them.
- Loading effect when turning pages.

**Github:** [https://github.com/NguyenUyen-ReactJs2206/Hygge\\_Event](https://github.com/NguyenUyen-ReactJs2206/Hygge_Event)

### Technologies and tool used:

- Framework: React Js (Typescript)
- Build tool: Vite.
- Call APIs: Axios.
- UI / CSS Library: Tailwind Css.
- State Management: Redux Toolkit with createAsyncThunk.
- Form Management: React Hook Form.
- Router: React Router.
- Show message: React toastify.
- ESLint, Prettier.

### Website:

<https://articles-app-seven.vercel.app/>

### Conclude:

This is the main project I did to better understand how reduxToolkit works and learn how to handle asynchronous tasks in Redux using createAsyncThunk

### Functions include:

- Manage authentication with JWT (automatic token refresh applied).
- Get list article and pagination.
- Asynchronous state management with Redux Toolkit.
- Function to favorite articles and call favorite articles.
- CRUD articles.
- User profile editing function.
- Synchronize urls for pages, user-friendly.

### Github:

[https://github.com/NguyenUyen-ReactJs2206/Blog\\_App](https://github.com/NguyenUyen-ReactJs2206/Blog_App)

## ● SHOPEE

Marth 2023 - April 2023

### Technologies and tool used:

- Framework: React Js (Typescript)
- Build tool: Vite.
- Call APIs: Axios.
- UI / CSS Library: Tailwind Css + HeadlessUI.
- State Management: React Query.
- Form Management: React Hook Form and validation with Yup.
- Router: React Router.
- Show message: React Toastify.
- SEO: React Helmet.
- Improve page load performance: React Lazy Load.
- Multi language: React.i18next.
- Uni test: Vitest.
- ESLint, Prettier.

### Website:

<https://shopee-clone-woad.vercel.app/>

### Conclude:

Thanks to this project, it helps me understand more about logic in Website E-commerce, better understand how to manage state with React Query and many other technologies are used in the project.

### Functions include:

- Manage authentication with JWT (automatic token refresh applied)
- Use the Yup and React Hook Form to validate the form.
- Smart Pagination, Filter, and Product SearchIncorporate state into the URL to easily share results across devices.
- Asynchronous state management with React Query
- Code Splitting.
- Improve performance by optimizing build file size analysis.
- SEO with React HelmetSeparate the private and public routes.

### Github:

[https://github.com/NguyenUyen-ReactJs2206/Clone\\_Shopee](https://github.com/NguyenUyen-ReactJs2206/Clone_Shopee)

- Below are 2 projects I learned to better understand HTML, CSS and JS.

## NEWS WEB

November 2023

This is a project I just learned with full functionality of a news website. The website uses Bootstrap and pure JS to help me become more proficient in Js as well as the logic processing process to create a complete website.

### Technologies and tool used:

Semantic HTML, CSS, Bootstrap, Javascript.

**Website:** <https://news-web-five.vercel.app/>

**Github:** [https://github.com/NguyenUyen-ReactJs2206/News\\_Web](https://github.com/NguyenUyen-ReactJs2206/News_Web)

## SELFTAUGHT LAYOUT

This is a project i write in my free time to improve my CSS, SCSS writing skills

### Technologies and tool used:

Semantic HTML, CSS, SCSS.

**Website:** <https://selftaught-one.vercel.app/>

**Github:** [https://github.com/NguyenUyen-ReactJs2206/Landing\\_Page\\_Responsive/tree/main/SELFTAUGHT](https://github.com/NguyenUyen-ReactJs2206/Landing_Page_Responsive/tree/main/SELFTAUGHT)

- This is my portfolio: <https://cv-nguyen-thi-thu-uyen-frontend.vercel.app/>

Now I am confident I can take on the position of Front-end Developer with the knowledge presented above. And I look forward to learning and accumulating more experience to apply to my work in the most optimal way.

Thank you for viewing my CV!
